The screenshot shows a web browser window displaying a support article from MailSPEc. The browser's address bar shows the URL `support.mailspcc.com/app9/t/article/7`. The page title is "How to Configure the MAPI Connector with Outlook 2019?".

On the left side, there is a sidebar with a "Users" section containing a list of users:

- Josh Olson
- 5 yrs Unrated
- 5 yrs Unrated
- Unqualified

The main content area contains the following text:

Paragraph - The MAPI plugin for Outlook allows you to use an email account with all the usual pros of a standard ActiveSync connection to the [CommunicoGate](#) server while mapping all directories to their CGP equivalents, such as RSS feeds, searches, Outlook's Rec Mailbox's Trash folder, etc.

The more important features of the MAPI connector include shared mailboxes, calls, and chats being made directly from Outlook and the implementation of server-wide filter rules/mailbox delegation to Outlook.

Let's start the MAPI configuration by downloading the latest version from the links in our [Help Desk](#).

<https://helpdesk.communicogate.com/en/downloads>

You just need to extract the archive, run the setup.exe and click on the "Install" button in order to install the MAPI plugin.

Then you can go to your **Control Panel** -> **User Accounts** -> **Mail** in order to add a new profile or to modify an existing profile by selecting it and clicking "Properties". In our example, we'll add a new profile:

The "Mail" dialog box is overlaid on the article, showing the "General" tab. It displays the text: "The following profiles are set up on this computer:". Below this, there is a list of profiles, with the "Add..." button highlighted by a red box. At the bottom, there are radio buttons for "Prompt for a profile to be used" and "Always use this profile", with the latter selected.

At the bottom of the article, there is a note: "On the following screen, make sure you choose the option for 'Manual setup or additional server types', where you will have the [CommunicoGate](#) Pro Server listed under 'Other'."
