The screenshot displays a Jira ticket interface. At the top, a code block contains a table of article data:

Below the code block, the ticket history shows:

- Eloise Rea** (Dec 31 2023, 10:06 am): @jducro the customer has said that the images were added by copying and pasting from a word document but that is the same process for all other articles
- Julien Ducro** (Nov 20 2023, 1:41 pm): I planned to add a migration to fix existing content, but the fix relies on calling dpv5, which can't be done within a migration. Customer will have to press save again on the incriminated pages to fix them.
- Julien Ducro** (Nov 20 2023, 2:36 pm): AC Evidences: (tested on each type of content but don't upload 8 videos)
- James Godwin** (Nov 22 2023, 3:09 pm): @spaulg please review <https://github.com/deskpro/deskpro-product/pull/12235>
- David Anjonrin-Ohu** (Nov 22 2023, 3:09 pm): Add a comment...

The interface also shows a 'Story Activity' section at the bottom with a 'Showing: Everything' filter and a 'Oldest first' sort order.
