Automatic SSO - redirect user to their landing page

Avanish - 2022-12-21 - [Comentarios (0)](#) - [the first one's](#)

- Set up a SSO. e.g. SAML or JWT

- Enable automatic SSO option. i.e. going to help center will automatically redirect you off to the SSO login

- Create a KB article and copy the permalink to the article

- In a new browser, enter the URL to the KB article directly -> *You get redirected to the SSO as expected*

- log in using SSO cred (if necessary)
