Test tiny mice

The screenshot displays a web application interface for searching tickets. The main content area shows "No Tickets" with the message "Enter a search term or select fields to start searching." The interface includes a sidebar with navigation options like "Mine", "Test QA", "INBOX", and "Lists". A "Refine Search" panel is visible on the right, and a developer console at the bottom right shows a JavaScript error: "Uncaught Error: No element found for selector: '#error'".

Annotations with red arrows and numbers point to specific elements:

- 1: Points to the search input field in the top left.
- 2: Points to the "Search" button in the sidebar.
- 3: Points to the "New Search" button in the sidebar.
- 4: Points to the "Error" message in the developer console.
